

Gamer's Club

Social Group for Gamers!

Calling all Gamers!

What's more fun than games?! Kids will participate in a socially supported club environment where various hands-on games (no videos) are used to encourage higher level thinking skills, such as problem solving, memory, critical thinking and concept formation. Good sportsmanship and flexibility methods will be taught to support a life-long love to play games with others by our Behavioral Specialist, Heather Walsh. Games will include Chess, Battleship, Mastermind, plus creating our own games! Studies support connections with those who play critical thinking games with higher reading comprehension and math skills, as well as better relationships with peers. Come get your game on!

About the instructor: Heather Walsh is a nationally-certified behavioral specialist who has worked with children and their families for over 12 years utilizing a goal-oriented approach to encourage positive outcomes for her students.

How to sign up: Pick ANY 4 Wednesdays to participate in:

_____ June 15 _____ June 22 _____ June 29 _____ July 6

_____ July 13 _____ July 20

Times: 5-6
